

Building Trades 1

Credit: 1

Pre requisite: None

This course gives students an introduction to the construction industry. Students will learn blueprint reading skills, construction terminology, and basic construction skills. The student will build a project.

Building Trades 2

Credit: 3

Prerequisite: CADD and Building Trades 1 recommended

Application is required. See Mr. Brooks or your counselor

This program prepares students for employment in the construction field. Successful completion of this program includes 12 articulation credits from Trinidad State community college in the state of Colorado. Students learn the identification, care, and use of hand and power tools, and construction methods for floor, wall, and roof framing. The class project is the construction of a house. The class meets for two periods for the entire school year. This class counts for three classes on your schedule.
